### Educational Background

I received my MD degree with honors in 1997 from the University of Kosin College of Medicine (Pusan, Korea). I became a Fellow in 2002 from the University of Ulsan College of Medicine, Asan Medical Center (Seoul, Korea). I obtained a Ph.D. in Radiology from University of Ulsan College of Medicine (Ulsan, Korea).

### Professional Experience

I am currently a professor of Interventional Radiology, department of radiology at the University of Ulsan College of Medicine, Asan Medical Center, Seoul, Korea.

I invented PARTO procedure, some biliary metallic stents, and endovascular embolization techniques.

My clinical expertise is in hepatobiliary diseases, liver transplantation, and vascular diseases. I also have specific training in Interventional Radiology in patients with portal hypertension for therapeutic control of variceal bleeding, benign and malignant biliary diseases, and hepatocellular carcinoma. I am available to perform most of interventional procedures needed in patients with vascular and non-vascular diseases.

### Main Scientific Publications

I published more than 200 international papers.
